- WORK EXPERIENCE
- Senior Offensive Security Consultant • Zerolynx

July 2024 → PresentMadrid, Spain

- I have effectively conducted Intranet infrastructure assessments, and Active Directory assessments
 - I have conducted Web assetsments on public and private organisations
 - I have been part of the team that conduct Red Team exercises.

Pentester - Security Researcher • Mnemo

Jan 2024 → July 2024Madrid, Spain

- I have effectively conducted Intranet infrastructure and Active Directory assessments
 - I have conducted Web assetsments on public and private organisations

Pentester - Red Team Operator • EY

Sep 2022 → Jan 2024Madrid, Spain

- I have effectively conducted Intranet infrastructure assessments, employing automated tools such as Nmap and Nessus, alongside manual testing of open protocols
 - I have actively participated in various web pentest assessments of different CMS platforms and custom websites, using analysis tools such as Burp Suite and proprietary solutions.
 - I have been a valuable team member involved in the design and implementation of the internal infrastructure dedicated to conducting Red Team exercises.
 - I have actively contributed to high-value client integrations and solutions. For instance, I have created OSINT scripts for the detection of compromised accounts and enhanced the performance of the reports we deliver to clients.
 - I have been a part of the Red Team responsible for exploiting vulnerabilities in the external network, creating phishing pages, and conducting Red Teaming exercises involving command and control (C&C).
- Cybersecurity Consultant • EY

Jun 2022 → Sep 2022Madrid, Spain

- I was part of the security team responsible for analyzing the latest vulnerabilities and notify to our client. Also analized the systems that were vulnerable to them and contact to tech support to follow up until the vulnerability was closed.
 - Participate on a multinational client by perfroming technical support on discovering affected assets using Qualys and Acunetix as main tool.
 - Participated on the retest of the vulnerabilities patched and Bug Bounty.
- Fullstack Developer • Wunderapp SL

Sep 2019 → Jun 2022Logroño, Spain

- I have successfully developed an integration of a custom CRM based on an ERP system using its SQL Server database.
 - Developed a web panel using PHP Symfony (Silex) as Backend engine and JQuery, Bootstrap and Ajax calls in the Frontend.
 - Developed a mobile application for the management of an intelligent warehouse using the Cordova Framework.
- Internship Developer • Terabyte 2003

Apr 2019 → Jun 2019Logroño, Spain

- Engaged in the ongoing maintenance and support of a C-based framework, leveraging our proprietary software solutions for optimal performance and functionality
 - Executing a comprehensive data migration process, transitioning from the existing C framework project to a Ruby-based system. This entails meticulous data mapping, transformation, and adaptation to ensure a smooth and successful transition while preserving data integrity and functionality
